SAC Members,

Forwarding a message from George Burwick at the Foundation.

The Foundation has negotiated a very aggressive discount on the Cisco Umbrella/OpenDNS solution available through the Foundation's CDW-G contract (CB-185-15). Threats from Ransomware are increasing and causing our districts time, money and energy to combat this growing problem. OpenDNS is an effective solution to defend the assets of our system. Previously, the most aggressive pricing model we have seen from OpenDNS has been \$20.44/seat (licensed by full time faculty & full time staff; Students covered for free). The New Foundation Negotiated pricing is \$12/seat. If you are unfamiliar with this tool, here is some additional information: <https://umbrella.cisco.com/>

Sincerely,

Jorge Burwick
